

VICOSTONE
The Art of Quartz

MILESTONES

Vicostone is a leading global manufacturer of quartz-based engineered stone. Established in 2002, Vicostone has grown to operate six slab production lines in Hanoi, Vietnam using the most advanced techniques in the industry and the latest technology from Breton S.p.A. of Italy. Thirty million square feet of Vicostone are made every year and sold in over 50 countries.

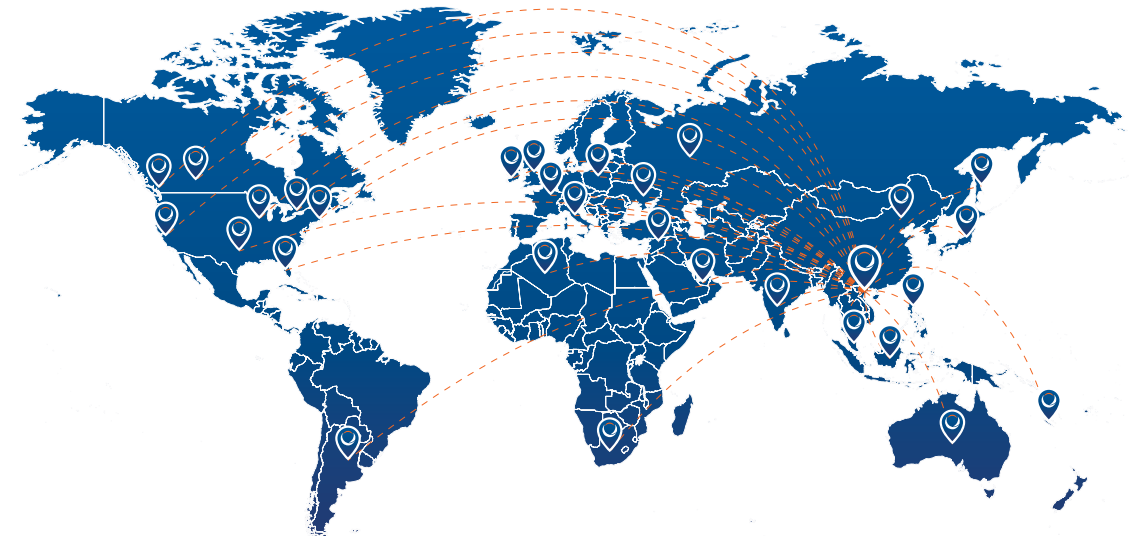

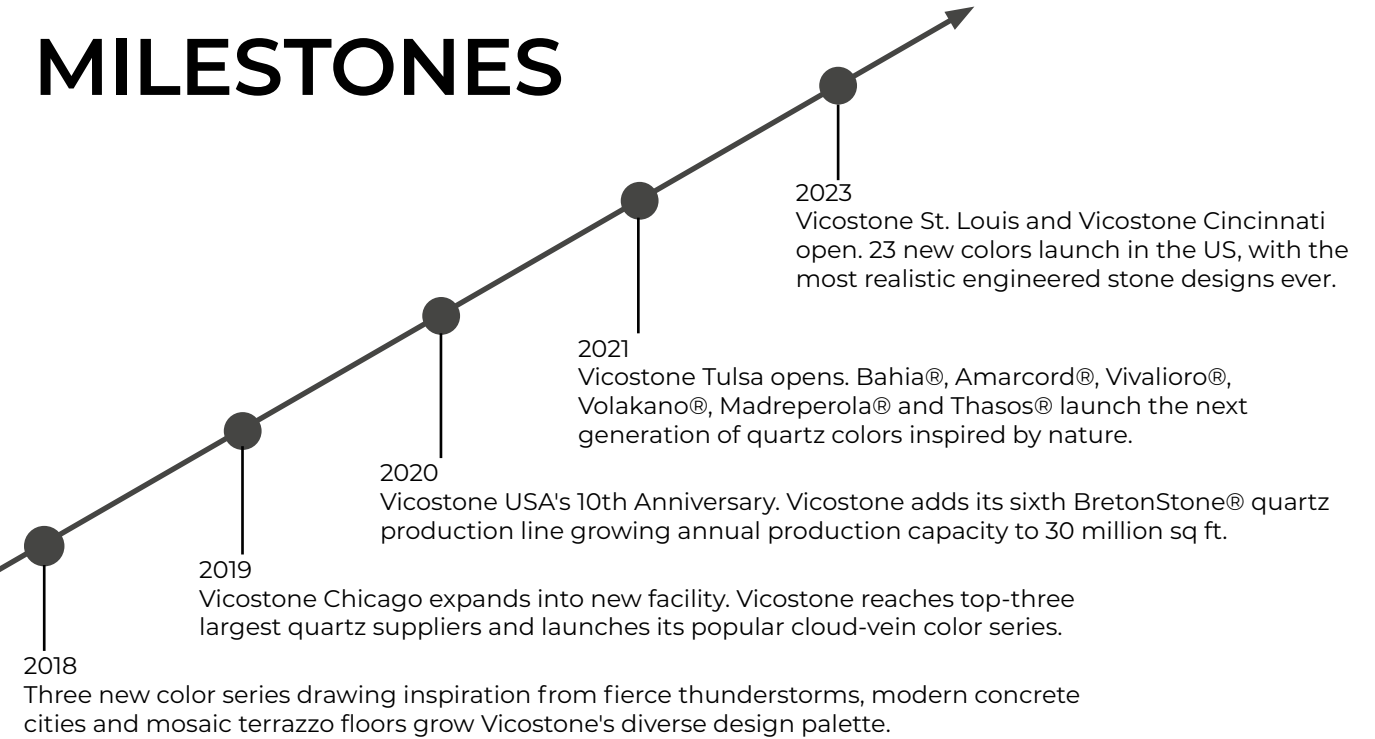

2017
Vicostone's innovation leads the industry after 15 years of research & development. New travertine vein-cut quartz and fusion quartz colors showcase unique creativity.

2015
Vicostone Atlanta and Vicostone Houston open. Misterio®, Statuario™ and Venatino™ quartz establish Vicostone as a leading marble-look quartz manufacturer.

2014
Vicostone Chicago opens. Vicostone's realistic granite-look quartz colors Alaska White™, Safari® and Bianco Romano® receive praise.

2010
Vicostone USA is established in Dallas, Texas. Vicostone's distribution reaches North America, Australia and Europe.

2002
Vicostone J.S.C. is established in Hanoi, Vietnam. Operations begin with a single BretonStone® quartz production line.

Creative Style

Vicostone quartz-based engineered stone is made from up to 93% pure natural quartz aggregates which are adhered with polymer resin and color powder. Its high percentage of quartz content gives Vicostone a hardness and flexural strength that is much higher than natural stones or non-Breton quartz products. The Vicostone collections feature modern styles and trends that leading architects and designers prefer and expect. Offering a rich color palette including neutrals, cool and warm tones, unique patterns, gemstone designs and nature-inspired looks, Vicostone is among the best quartz manufacturers in the world.

Sustainable Beauty

Vicostone products come with a Declare label, Health Product Declaration (HPD), Environmental Product Declaration (EPD), and contribute to LEED points for green building certification. The Vicostone factory and facilities preserve environmental balance by complying with and exceeding the strictest international and local standards.

Durable

Quartz is one of the earth's hardest natural minerals. Vicostone's high quartz content and advanced technology create an extremely durable stone that is resistant to scratches, heat, impact and corrosive chemical agents like acids or common cleaning solvents. Each Vicostone product is meticulously checked for quality and made to last.

Safe

Vicostone products come with critical health and safety certifications that contribute to the well-being of our communities. Vicostone is GREENGUARD certified free of volatile organic compounds and safe for the indoor air quality of buildings. It is GREENGUARD Gold certified safe for use in sensitive environments like schools and healthcare facilities. Vicostone is also certified safe for food preparation in commercial kitchens by NSF International.

Easy to Clean

Vicostone is engineered for low maintenance. Nonporous and stain resistant, Vicostone quartz surfaces are simply wiped clean and never have to be sealed or polished. Vicostone is microbial resistant and easily disinfected with antibacterial soap and water.

Microbial Resistance
ASTM D 6329-98

EXOTIC COLLECTION

Colorful, dramatic, and inspired by nature, the **EXOTIC** Collection features Vicostone's most innovative designs. Bold veining and stylish patterns provide a premium surface for interior designs.
